

```
def get_navbar():  
    site = Site.objects.get(is_default_site=True)  
    home_page = site.root_page  
    pages = home_page.get_children().live().in_menu()  
  
    return {  
        "pages": pages,  
    }
```

surviving_seattle/templatetags/nav_tags.py

EDITING localhost [default]

Hostname: *

localhost

Port: *

80

Set this to something other than 80 if you need a specific port number to appear in URLs (e.g. development on port 8000). Does not affect request handling (so port forwarding still works).

Site name

Human-readable name for the site.

Root page: *

Surviving Seattle

CLEAR CHOICE

CHOOSE A DIFFERENT ROOT PAGE

EDIT THIS PAGE

Is default site:

If true, this site will handle requests for all other hostnames that do not have a site entry of their own
