

THIS PART'S JUST LIKE DJANGO.

\$ python manage.py startapp blog

&

Add blog to your settings.py in installed apps

```
class BlogIndexPage (Page) :  
    subtitle = models.CharField(  
        max_length=255, default="Recent Posts")  
    body = RichTextField(blank=True)  
  
    content_panels = Page.content_panels + [  
        FieldPanel('subtitle'),  
        FieldPanel('body')  
    ]
```

blog.models
